Professional Summary

Full-Stack Software Engineer with 4+ years of hands-on experience in developing scalable web applications using JavaScript, TypeScript, Go, PHP, React, and Node.js. Proven ability to deliver high-quality code in fast-paced environments across startups and global tech firms like eBay.

Adaptable, reliable, and passionate about building solutions that drive business growth. Now seeking a long-term opportunity where I can contribute my technical expertise and grow within a stable and innovative team environment.

Skills

Programming: JavaScript, TypeScript, PHP, Go, Python, Java, GraphQL, SQL
Frontend: React, Next.js, React Native, Angular, Tailwind CSS, Bootstrap, Redux
Backend: Node.js, Express.js, NestJS, Fastify, Flask, Symfony, Fast API, SpringBoot
Database: PostgreSQL, MySQL, MongoDB
Tools: Git, Docker, Figma, Adobe Photoshop
Others: Redux, RxJS, Zustand, React Hook Form, WebSockets, Shadcn/ui, Daisy UI, Material UI, Radix UI

Soft Skills

Adaptable, Initiative-taking, Team Player, Problem-solving, Analytical Thinking

Experience

Software Engineer / eBay GmbH, Germany (Hybrid) / Dec 2024 – April 2025

- Led the migration of 45% of a Vue.js (JavaScript) application to a modern React stack (Vite, TypeScript), implementing best practices for code optimization, modularity, and performance enhancement.
- Designed and deployed a custom API metric tracking solution, resulting in a 100% increase in server performance visibility and enabling faster, data-driven decision-making.
- Derived a solution for python local development with Docker (local Database) utilizing PyCharm and Docker Network, increasing developer productivity by 400%.

Career Break / Career Transition / Sept 2024 – Nov 2024

- Took a short professional break following the end of my role at Cogitanda due to internal restructuring. Used this time to reassess long-term career goals, stay current with industry trends, and prepare for a stable, growth-focused software engineering opportunity aligned with my skills and aspirations.

Platform Developer / Cogitanda GmbH, Germany (Remote) / Mar 2024 – Aug 2024

- Architected and developed the internal employee website with CMS features using Outsystems Service Studio, enhancing internal communication efficiency by 45%.
- Configured and optimized key components of the company's Insurance Portal with Axon, streamlining user interaction and operational workflows.

- Implemented advanced XSLT stylesheets for document design and markup, ensuring consistent and responsive presentation across multiple formats.
- Position affected by internal company reorganization.

Software Engineer / *SeDoMo.io, Germany (Remote)* / Aug 2022 – Feb 2024

- Collaborated in feature prioritization and strategic decision-making, playing a pivotal role in improving app features and aligning them with business objectives.
- Applied advanced expertise in Angular, Symfony, and GraphQL, and more to deliver scalable, high-quality code and end-to-end solutions, ensuring robust performance and functionality.
- Led the design and development of hierarchical and grouped technical asset relations, enhancing user accessibility, improving UX, and optimizing asset management features for streamlined workflows and better scalability.

Software Engineer / *GoodOldGeek IT Services, India (On-site)* / Nov 2020 – Mar 2022

- Led a team of 3 developers and mentored 2 interns while driving the development of scalable full-stack solutions, leveraging React, React Native and PHP to enhance system performance and achieve project milestones on time.
- Engineered and integrated high-performance APIs using PHP and MySQL, optimizing data flow and ensuring seamless functionality across web applications, resulting in improved system efficiency and user experience.
- Spearheaded collaborative efforts to design, develop, and deploy innovative features, consistently delivering high-quality solutions to meet project objectives and enhance the user experience.

Jr. Software Engineer / *GoodOldGeek IT Services, India (On-site)* / May 2020 – Oct 2020

- Proficiently developed WordPress websites & e-commerce store and cross-platform applications as a Full Stack Developer, utilizing React Native for mobile app development and PHP with MySQL.
- Leveraged Adobe Photoshop to craft visually captivating graphics for a diverse range of mediums, including social media posts, brochures, website content, and mobile applications, enhancing overall visual branding and engagement.
- Being hired after 3 months internship assumed responsibility for collaborating effectively with multidisciplinary teams to plan, develop, and deploy software solutions, consistently achieving project milestones and delivering reliable code.

Projects

- **API Perf Agent (TypeScript, React):** Architected and developed a custom API performance agent for eBay, enabling real-time tracking of API performance metrics.
- **Met Asia CRM (Next.js, PostgreSQL):** Led design and development of a custom web-based CRM with ticketing, transaction management, report generation, and filtration of over 20 unique attributes
- **Castle Lubricants (React Native, Next.js, PHP):** Engineered a multi-vendor service app for products offered by client where customers where can request and track services for their vehicles, with rewards and loyalty program.
- **Training and Placement Cell (PHP, MySQL):** Developed an Application Tracking System for the university's training and placement cell for companies, students, and faculties, with a built-in resume builder

Education

B.Sc. Information Technology
 Uka Tarsadia University, Bardoli (Surat), India
 Graduated: September 2020 | CGPA: 8.00/10
